An Examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable to Applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the Issue Fee.

IN THE CLAIMS:

Cancel Claim 5.

Claim 7, line 4, after "source" insert -- to provide current in a first direction --, and in line 6, after "source" insert -- to provide current in a second direction different from the first --.

Cancel Claim 12.

Authorization for this Examiner's Amendment was given in a telephone interview with Charles A. Mirho on 8/13/2007.

The following is an Examiner's Statement of Reasons for Allowance: The Prior Art of Record does not disclose nor suggest the Claimed Combinations found within Independent Claims 1, 7, 15 and 16. There also does not appear to be strong motivation for combining and/or modifying the References so as to come up with the Claimed Combinations found within Independent Claims 1, 7, 15 and 16. Although the Prior Art teaches applying an opposite voltage to the solenoid lead in response to a sensor activating a switch, there does not appear to be a suggestion of applying a current in a different direction to the first applied current to the solenoid from a second current source, in the response. The Prior Art relies upon the voltage difference in applied opposing voltages to obtain a predetermined voltage value for which the solenoid is deactivated. The Combinations in Claims 15 and 16 each

Art Unit: 2836

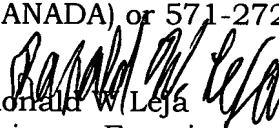

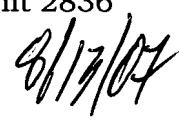

contain specifically combined structures not disclosed nor suggested by the Prior Art of Record.

Any comments considered necessary by Applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
